**Pipe fouling cleaning  
Water Industry**

# Case: Pipe fouling cleaning

## Issue

Customer was having issues with a section of a pipeline that was filled with hard fat fouling.

## Objectives

To clean the the pipeline during short sonication period of 15 minutes and 45 minutes, when the process was online.

## Results

The customer's pipes were cleaned completely. Based on customer's previous experiences in cleaning this type of fouling, no other method has been as effective and simple to implement as power ultrasound.
